Job Description

Build up Nepal is looking for an experienced Civil Engineer/Quality manager to join our team. We work with reconstruction in remote rural areas.

The job consist of three parts:

1. Ensure construction quality in each of our projects

- Developing routines and system to ensure quality
- Visit sites for inspection
- Ensure that quality routines are followed and implemented
- Find the proper methods to measure and ensure quality in remote and rural locations.
- Develop training for new employees and make sure all trainers are teaching the same techniques
- Build a learning environment in the organisation so that new knowledge an information is shared.

2. Financial cross-checking.

- You will also be working together with our finance team for financial cross-checking of different construction projects.
- Cross-checking purchases, transport and labor expenditure in different projects.

3. Follow up

- Make sure that each project is getting proper follow up so that we can evaluate the results and take action to turn-around bad projects.

We are looking for a highly driven and self motivated person ready to walk the extra mile for the reconstruction of Nepal.
