

Frontend Developer

- **Vacancy for:** 1
- **Posted on:** Sept. 13, 2018
- **Deadline:** Oct. 2, 2018, 11:55 p.m.

IntroCept is looking for a Front End Developer to help us improve our existing product design and various websites, and create new websites, web applications and mobile applications.

This is a mid-level position with the opportunity to grow, get great experience within a small team of friendly developers, take on more responsibility in the future and help influence our technical direction.

Ideally, candidate, you'd have

- More than 1 years' experience of working as a front-end developer or have worked on products you can demonstrate to us.
- You should have a solid understanding of HTML, CSS, Sass and Javascript experience with a framework like Angularjs, Vuejs and Reactjs, built tool like web pack, rollup.
- Knowledge of PHP programming. Our websites and backend systems are built using PHP and you should have built something with either language in the past.
- If you have any experience with Photoshop, Illustrator or similar software that would be beneficial but not essential.
- Some knowledge of UX or usability practices to produce better customer experiences would be great.
- Because you'll be helping to produce product pages and other customer content good written English skills are required.

IntroCept Benefits

- Attractive Salary
- Festival Allowance
- Free Meal
- Performance Bonus
- Regular team building activities
- Challenging and friendly working environment
- Develop global reach and networks
- Accredited online learning opportunities

If you are a driven and motivated professional with a huge appetite to learn and want to take direction with some of the most talented in the industry, we want to hear from you
