Job Description

As a Front-end Engineer, you will lead the implementation of our online video editing interface that feels like magic even in its MVP state.

We are a team that values and invests in design and research, so we can delight our users. The ideal candidate can make the browser do a backflip and land on its toes, all without dropping a frame. Experience with large front-end codebases and mobile apps is a plus.

- Build beautiful user interfaces across our exciting product portfolio.
- Write well-tested, reliable code for use by our enterprise customers
- Work on the most interesting and challenging problems in web application development
- Get exposure to the latest technologies and developments in a technology and product driven company
- Work with a founding team of graduates from top-tier Ivy school graduates.
