Job Description

We are looking for an iOS developer responsible for the development and maintenance of applications aimed at a vast number of iOS devices. Your primary focus would be to ensure the quality and responsiveness of the app and help maintain code quality. You will be working along-side other engineers and developers working on different layers of the infrastructure.

Skills and Requirements

- Proficient with Objective-C or Swift
- Experience with offline storage, threading, and performance tuning
- Familiarity with RESTful APIs to connect iOS applications to back-end services
- Experience with streaming and media related projects is plus
- Knowledge of other web technologies and UI/UX standards is plus
- Understanding of Apple's design principles and interface guidelines
- Experience with performance and memory tuning with tools such as Instruments and Shark
- Familiarity with cloud message APIs and push notifications
- Proficient understanding of code versioning tools such as Git
- Familiarity with continuous integration

Company Benefits

- Rapidly growing globally successful company
- Attractive salary- No bar for qualified candidate
- Small, focused team of highly talented professionals
- Solve interesting real-world problems for real people
- Lunch and transportation allowance
- 5 working days per week
- Open door structure – Flat hierarchy and fun working environment
- Provident Fund, Dashain Bonus, Overtime allowance
- Stimulating and challenging environment

Applying Procedure

Cover letter is the key to get you in the next stage and we highly value well written cover letter which tell us more about who you are, what you value, and why you care about your work. Please be authentic and personal.
