Job Description

We are looking for an iOS developer responsible for the development and maintenance of related IOS applications. You will be working alongside other engineers and developers working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and the creation of quality products is essential.

Responsibilities:

- Design and build applications for the iOS platform
- Ensure the performance, quality, and responsiveness of applications
- Help maintain code quality, organization, and automatization
- Hands-on development: analyze product specifications, design implementations, write code and rapidly deliver iOS app feature designs
- Participation in software design, estimation of development tasks, testing and related functions

General Requirements:

- Bachelor's Degree in Computer Science or a related discipline
- 2+ Years of Hands-on Experience in iOS development
- Knowledge of development methodologies & processes
- Experience with offline storage, threading, and performance tuning
- Familiarity with RESTful APIs to connect iOS applications to back-end services
- Knowledge of other web technologies and UI/UX standards
- Experience with performance and memory tuning with tools
- Contribute technical ideas and suggestions to enhance the direction of the product
- Creative thinking & abstract technical problem solving
- Excellent communication skill and proven ability to carry on a business conversation at all levels
- Ability to interpret business requirement and develop technical solutions
- Ability to work well independently and in a team environment

TO APPLY,

Interested candidates are requested to submit their updated CV through Email: vacancy@inficare.net
