Job Description

Are you eager to cut through the noise and bureaucracy of corporate software development? Or just wanting to make a name for yourself in a dynamic team environment? Or perhaps looking for a reason to sharpen all of your skills? Anyone interested in cutting-edge web and service-based development is welcome. ITONICS is looking for an enthusiastic Java Developer to join our team.

Your responsibilities will include:

- Design and implementation of multi-tenant cloud services used by our client applications (web and mobile)
- Support the expansion of our infrastructure with design and implementation of services that can be load balanced across multiple servers in Java
- Understanding of SOLID Principles, RESTful services, application design patterns, multi-tenant architectures in order to deliver the best possible software
- Building a pure cloud solution focusing on 99.999% availability servicing the entire globe
- Implement pipeline processes of massive amounts of unstructured documents to automatically analyze, enrich and categorize
- Maintain our semantic recommendation system using various machine learning and clustering techniques to provide even further insights

ITONICS is offering:

A position with an established leader of innovation and strategic management enterprise software/solutions. Sounds boring so far. We are not focussing on millions of customers loving our location based dating app. We make market leading companies in all industries even stronger by boosting their innovation and strategic functions. This requires lots of solid development work and even more magic. If you are the type of person having fun within extreme complexity and building in some magic in your code - let's talk! At ITONICS you'll be part of an industrial dawn of innovation through insight and

collaboration. Building large scale solutions to answer both demanding high level and concrete questions about the future. Welcoming experienced developers with various levels of savviness and focuses, ITONICS has a place for anyone that is devoted to technology and forward thinking. The ITONICS team is looking for eager and self- motivated individuals to drive solutions into the future.

Please ONLY apply if you are available to undertake the position onsite in Kathmandu, Nepal. Grab the chance to work in one of the most exciting and innovative areas in the industry in one of the most exciting cities on the globe - NOW!

Applying Procedure:

If you show a strong interest and are familiar with some of our technologies, send us your resume(cover letter, CV) to us at **jobs-kathmandu@itonics.de**
