Job Description

Khozinfo is seeking a full time, full stack PHP software developer to join our growing in-house software development team. Our software is written using the Laravel Framework, PHP, MySQL, JavaScript, HTML and CSS. We also use modern tools, including git, Bootstrap, composer etc.

Responsibilities:

Further develop the software systems using Laravel, including new modules, enhancements, etc.

Qualifications:

- PHP, JavaScript, CSS3, and HTML, 2+ years of experience.
- PHP MVC Framework experience, preferably Laravel, including:
- Framework concepts, routing, service providers, etc.
- ORM and/or Active Record, such as Eloquent
- HTML templating, such as Blade.
- MySQL or equivalent, database design & normalization.
- Software development life cycle.
- Strong problem solving skills and a keen attention to detail.
- Code debugging skills and problem solving with minimal guidance.
- Works well in a team-oriented, collaborative environment.
- Good listening, interpersonal, written and oral communication skills.
- Highly self-motivated and directed.

Desirable Skills & Experience:

- Version control software, preferably Git or SVN.
- Composer and npm.
- Bootstrap, Foundation or equivalent CSS framework.
- Web services, SOAP and/or RESTful.

Offered Salary: Best in the market standard upto NPR 50,000/month

Applying Procedure:
