Job Description

Raman Construction have enjoyed significant success and more recently secured multiple projects across Nepal. Due to these new projects we now wish to appoint a Project Manager to ensure these deliveries.

Project Manager is executive role responsible for leading the delivery of complex commercial construction projects to budget, time and quality objectives in a professional, systematic and controlled manner.

Duties and responsibilities:

- Planning, scheduling, monitoring and controlling of the whole/ overall project
- Preparation of Planning Schedule of Work through MS-Project including designing WBS for all the Items, allocating the resources like Manpower and Material over all the works, and Bar Chart for the Project
- Plan, organize, and direct activities concerned with the construction and maintenance of structures, facilities, and systems
- Working of Overheads for the project at the time of the Resource mobilization and further analysis
- Develop and implement quality control programs
- Proper coordination with the contractor's representative and the director's about the project progress and other relevant activities
- Prepare and submit budget estimates and progress and cost tracking reports
- Prepare contracts and negotiate revisions, changes and additions to contractual agreements with architects, consultants, clients, suppliers and subcontractors

- Take actions to deal with the results of delays, bad weather, or emergencies at construction site
 - Confer with supervisory personnel, owners, contractors, and design professionals to discuss and resolve matters such as work procedures, complaints, and construction problems
 - Investigate damage, accidents, or delays at construction sites, to ensure that proper procedures are being carried out
 - Appropriate decisions taking as per the need of the site situation
-
