Offered Salary	: NRs. 20,000.00 - 30,000.00 Monthly

Job Specification

Education Level : Under Graduate (Bachelor)
Experience Required : Less than 1 year

Job Description

QA engineer responsibilities include designing and implementing tests, debugging and defining corrective actions. You will also review system requirements and track quality assurance metrics (e.g. defect densities and open defect counts.)

The QA engineer role plays an important part in our company's product development process. Our ideal candidate will be responsible for conducting tests before product launches to ensure software runs smoothly and meets client needs while being cost-effective.

Ultimately, you should monitor all stages of software development to identify and resolve system malfunctions to meet quality standards.

Job Responsibilities:

- Review requirements, specifications and technical design documents to provide timely and meaningful feedback
- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities
- Design, develop and execute automation scripts using open source tools
- Identify, record, document thoroughly and track bugs
- Develop and apply testing processes for new and existing products to meet client needs
- Liaise with internal teams (e.g. developers and product managers) to identify system requirements
- Monitor debugging process results
- Investigate the causes of non-conforming software and train users to implement solutions
- Stay up-to-date with new testing tools and test strategies

Job Requirements:

- Previous work experience in software development is a plus
 - Previous work experience in software quality assurance
 - Knowledge of software QA methodologies, tools and processes
 - Experience in writing clear, concise and comprehensive test plans and test cases
 - Knowledge about white box and black box testing
 - Solid knowledge of SQL and scripting
 - Experience working in an Agile/Scrum development process
 - Experience with performance and/or security testing is a plus
 - BS/MS degree in Computer Science, Engineering or a related subject is a bonus
-
