Senior Frontend Developer

- **Vacancy for:** 2
- **Posted on:** Jan. 16, 2018
- **Deadline:** Jan. 22, 2018, 11:55 p.m.

Job Location: Mid-Baneshwor

No. of Vacancies: 02

Required Skills and Qualifications:

- 2-5+ year experience in a Front End Developer role with examples you can share of your previous work.
- Experience with HTML5, CSS3 and current front end libraries like Bootstrap.
- UX & design experience
- Experience with modern JavaScript frameworks and libraries.
- Experience in building modular, reusable UI components in JavaScript.
- Familiar with NPM/Bower, Gulp, Browserify, Sass.
- Calm under pressure in a fast-paced environment.
- Able to work independently / team on a project
- Should Not have problem working with WordPress
- Excellent communication skills, both written, and verbal

Job Responsibilities:

As Front End Engineer, you'll play a major role in developing and building complex client-side applications that tap into our services. You'll work closely with back-end engineers to develop user interfaces with modern web technologies that can be tested and scaled easily. Most of all you'll show a high level of technical excellence that will drive new ideas and deliver outstanding (and well-tested) code.

- Work within multidisciplinary teams of visual designers, UX, designers, and developers.
- Build prototype concepts to demonstrate and test ideas.
- Produce neat, tested, readable and well-documented code.
- Work with Photoshop, Illustrator to do image slicing, resizing, optimization, and other core manipulations.
- Follow with latest design trends
- Creative web mockup designing with photoshop etc.

We Offer:

- Healthy breakfast and snacks, 2 cups of coffee
- Very attractive salary
- 5 working days a week
- Creative and fun working environment
- Excellent growth opportunity
- Salary review according to performance
- Bonus for good performer

Salary: *Rs. 30,000 plus depending on ability to demonstrate experience.*
