Senior Full Stack Web Developer

- **Vacancy for:** 1
- **Posted on:** July 13, 2018
- **Deadline:** July 29, 2018, 11:55 p.m.

Basic Job Information

Job Category   : IT & Telecommunication > Programmer/ Software Engineer
Job Level   : Senior Level
Employment Type   : Full Time
Job Location   : Sanepa, Patan, Central Development Region, Nepal
Offered Salary   : NRs. 50,000 - 70,000 Monthly

Job Specification

Education Level   : Under Graduate (Bachelor)
Experience Required : More than 2 years

Other Specification

- Proficient knowledge of a back-end programming language PHP and MVC Frameworks (eg. Symfony, Laravel, Codeigniter)
- Proficient knowledge in ReactJS (VueJS is a plus)
- Good understanding of front-end technologies and platforms, such as JavaScript, HTML5, and CSS3
- Strong knowledge of object-oriented design patterns and software engineering best practices
- Experience with traditional SQL databases, APIs and Webservices(SOAP and/or REST)
- User authentication and authorization between multiple systems, servers, and environments
- Integration of multiple data sources and databases into one system
- Creating database schemas that represent and support business processes
- Proficient understanding of code versioning tools, such as Git

Job Description

- Design, build, test, deploy and maintain scalable, highly available, modular software products in the cloud
- Integration of user-facing elements developed by front-end developers with server-side logic
- Building high quality and reusable code and libraries for future use in an agile environment
- Starting projects from scratch and jumping into an existing architecture
- Design and implementation of data storage solutions
- Optimisation of the application for maximum speed, scalability, security and data protection
