Experience Required	: More than 2 years
Professional Skill Required	: PHP

Job Description

- Leading role in designing/optimizing/re-engineering of high-load and high-available systems, developed by Unifun for telecom operators
- Leading and managing a group of junior developers
- Code review and other quality assurance activity
- Providing support and improvement for existing projects

Requirements

- Advanced proficiency in coding and applying effective techniques
- Understanding of software development life cycle
- Extensive experience in pure-PHP (both OOP and procedural)
- Understanding coding standards and best practices for developing efficient and high-available back-end systems
- Advanced proficiency in SQL database development, writing and optimizing SQL statements, keys, relations, indexes, etc.
- Deep understanding of MySQL's underlying storage engines and processes
- Experience with Linux console, Git, Nginx/Apache
- Skills in team management and project management
- Ability to develop project architecture, identify and avoid the risks
- Experience in code review and optimization

Must-have skills

- Maximum attention to detail and analytical thinking
- Orientation on research of additional information independently
- Ability to organize workload taking full responsibility for what you do
- Ability to provide information clearly and shortly
- To be friendly and communicative

Benefits of joining Unifun

- Unlimited opportunities for fast career growth and professional development
- Dynamic and friendly work environment, lack of bureaucracy that make great things be done easier

Salary expectations

- Salary level of an International IT company
- Based on professional experience – any salary level can be discussed
