Job Description

For our QA team, we are looking for outstanding engineers to play a crucial role in assuring world-class quality in the next generation SIEM solution. We are seeking new colleagues, who are inspired by complex and advanced technology, want to work in a team-oriented environment and is motivated to solve a broad range of challenges. A big part of this job is scaling our testing efforts working with automation and continuous integration.

Responsibilities:

- Review requirements specifications and technical design documents to provide timely and meaningful feedback
- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan, and coordinate testing activities
- Design, develop and execute automation scripts using open source tools
- Identify, record, document thoroughly and track system defects
- Perform thorough regression testing when bugs are resolved
- Perform software quality assurance, including black and white box testing, user acceptance testing, and maintenance regression testing
- Evaluate testing - and inspection plans for projects of varying technology, complexity, and size
- Develop, document and maintain manual/automated test scripts, test cases, test data, defect tracking and reports
- Review log files and other run-time documentation for defects and issues
- Analyze the results of software tests and provide results for use in development code inspections

Requirements:

Education: Bachelor's Degree or Master's Degree in Computer Science or any relevant discipline.

Experience: 3+ years in Software QA

Other Job Specifications:

- Genuine passion for programming and testing
- Strong analytical skills and the ability to pay careful attention to detail
- Pride in your work and a strong sense of responsibility
- Be curious about how things work and love breaking things
- Be passionate about technology trends and all things related to testing
- Be excited about automation and building tools to help do your job and assist the rest of the team
- Problem-solving and independent researcher
- Experience in automation test frameworks
- Coding experience with Python, Java and web-based technologies
- Experience with SQL and databases

- Good knowledge on web vulnerabilities and security is a plus
- Able to learn things quickly and pick up new skills with little guidance and oversight
- Ability to work under tight time constraints with dynamic requirements
- Strong written and verbal communication skills
- Fun, positive attitude and a healthy desire for collaboration

Benefits:

- Attractive salary based on experience and qualifications
 - Gratuity and provident fund schemes
 - Working in a team environment where initiative and dedication is encouraged
 - An equal opportunity workplace that values diversity and does not discriminate
 - High level of responsibility and excellent career possibilities
 - Open international work environment
 - Festival expense allowance
 - Medical and accident insurance
 - Gymnasium/Fitness Membership
