Job Description

We are looking for motivated **Senior Software Engineers**, who have experience building state-of-the-art Web Applications. We are interested in working with level headed people who operate with a sense of confidence, humility and humour.

Basic Requirements Include:

Knowledge of OOP, Ruby/Rails, Javascript, Css, Unix, PostgreSQL, MVC, Web Services, RESTful Architecture, APIs, Front End Javascript Frameworks, Test Driven Development, Continuous Integration, Amazon Web Services, Servers and Deployment, Agile Methodologies, and anything else you would find in the arsenal of an accomplished Web Developer.

We also welcome applications if you've worked primarily on similar scripting languages and web development technologies such as Python, Perl, Laravel, Javascript, VueJS among others.

We offer a convenient 5 days/week work schedule, an enriching and hospitable working environment, and delicious lunch at work.

We believe one should never stop learning, and do all we can to empower our team members to continuously improve, so they are always happy and motivated. We look forward to hearing from you.
