Job Description

- You will take lead in designing and implementing systems to ensure the best user experience for maximum adoption. A commitment to teamwork, hustle, and strong communication skills are absolute requirements. Creating reliable, scalable and high performance services and architectures requires exceptional technical expertise. You should be somebody who enjoys working on complex system software, is customer centric, and feels strongly about personal growing by self learning.

- We are looking for talented, self motivated mid and entry level Software Developers to join our team and partner with us in developing our amazing line of applications. If you desire to be a smart professional with hands on with cutting-edge technologies and build ground-breaking applications with the start-of-the-art software development practices, then this is the company where you can take lead and make a significant impact.
