-

Job Description

- Build large scale crawlers crawling millions of pages
- Manage and improve existing crawlers using PHP and other technologies such as scrapy, selenium, phantomjs.
- Contribute towards the development of our crawling framework
- Work as part of a team to plan, design and develop product improvements and new features
- Be part of something big and push the cutting edge tools even further
- Communicate with the customer over e-mail to understand requirements, discuss possible solutions.

About You:

- You're a doer and a problem solver with hands-on attitude and a willingness to get things done
- You're a team player with strong interpersonal skills who collaborates and shares knowledge with your peers
- You pay attention to every small detail so that the outcome you come up with is always simple, clean, and organized
- You're experienced and you know that what you can do counts more than the academic credentials you have.
- You're curious and creative with a will to learn and go beyond boundaries

Benefits:

- Competitive compensation including salary and bonus based on experience, personal and company goals
- Open floor plan office at Bhim Plaza, Naxal, conveniently located at the heart of Kathmandu city near Nepal Police Headquarter

- Informal working environment and fun company culture
- Regular company outings, pub evenings and social events
- Free drinks/tea/coffee and weekly lunch
- Regular performance reviews
- Generous bonus program
