Sr Quality Assuarer

- **Vacancy for:** 5
- **Posted on:** Sept. 7, 2017
- **Deadline:** Oct. 8, 2017, 11:55 p.m.

Basic Job Information

Job Category	: IT & Telecommunication > Quality assurance, Web Developer/Web Designer, QA/QC
Job Level	: Senior Level
Employment Type	: Full Time
Job Location	: Kathmandu, Central Development Region, Nepal
Offered Salary	: NRs. 35,000.00 - 60,000.00 Monthly

Job Specification

Education Level	: Under Graduate (Bachelor)
Experience Required	: More than 2 years
Professional Skill Required	: Testing, Selenium, Automation, Python, Node.Js

Other Specification

- Demonstrated and clear ability to find and classify bugs in complex IT systems
- Experience of regression testing and testing generally
- Basic scripting in Python or NodeJS (both and / or other languages a plus)
- Ability to build automated web test cases using Selenium
- Experience working with and testing mobile phones
- Experience in automated IOS UI testing
- Experience in automated Android testing
- Experince in creating tickets in Jira

NOTE: Of the above skills, it will be reasonable that some of them (e.g. knowledge of BDD testing, or skill transfer from other UI automation frameworks to Selenium) is developed after the people are recruited to the roles.

Job Description

- Reproduction of bugs reported form operations or other teams and creation of automated test cases demonstrating those bugs
- Creation of new, failing, test cases related to future functionality
- Continual research of new test cases to assure quality of existing system through manual experimentation and testing leading to bugs (and automatic reproduction in regression tests)
