Job Description

We're looking for an experienced UI/UX Designer for building innovative, cross-platform user-centered design solutions for our medical SaaS products. In this exciting role, you get the opportunity to work in a fast-paced, creative environment where your designs will go into production. You are a creative problem-solver who transforms complex tasks into simplified, intuitive user experiences that incorporate customer feedback and meets business requirements. You enjoy solving tough design challenges in a cross-functional product team and work well independently to deliver best in class design solutions.

Responsibilities

- Gather and evaluate user requirements in collaboration with product owner and engineers.
- Understand our customers and serve as their advocate when making cross-platform design decisions using Sketch, Figma, FluidUI, Adobe XD, Zeplin, Axure or similar design software.
- Drive designs from concept, wireframe, prototype, to high-level clickable prototypes scale across the web and mobile platforms based on metrics and user insights.
- Deliver style guides, assets, and specifications for implementation of the user interface throughout the development process.
- Make strategic design and user-experience decisions to rapidly test and iterate designs.
- Take initiative and advocate for new and emerging technologies and platforms by maintaining a strong interest in new mobile technologies and platforms.

Skills and Qualification

- 2+ years experience in web, mobile and/or software applications.
- Strong knowledge of user interfaces design processes and methodology, typography, color theory and layout with an innovative and elegant design sense.
- Experience working in a collaborative team, and interacting directly with developers for implementation of designs.
- Proactive problem-solver with the ability to work efficiently in a fast-paced environment.
- A team player with excellent communication, presentation, and interpersonal skills.
- Ability to effectively manage time, prioritize and work on multiple projects at the same time.
- Familiar with Google Material Design and iOS Human Interface Guidelines.
- Experience working in an Agile/SCRUM development environment.

Benefits

- Competitive salary, flexible hours
